Dear Planning Commission,

I'm a homeowner on Coloma street and have been attending the city council meetings and past planning meetings. I am concerned about the proposed development in MLK Park and strongly urge the commission to not build in this area and preserve the natural beauty and recreational value of MLK Park. It would make so much more sense to add housing on more suitable sites south of Harbor Drive in the Marinship, where there are underutilized spaces like storage lots and vacant offices. This would help meet housing requirements without sacrificing valuable public park spaces, while revitalizing an area that is completely not utilized (and frankly an eyesore and a potential public safety issue) as it stands now.

Additionally, I support the inclusion of view preservation standards in the Objective Design and Development Standards (ODDS) to ensure that Sausalito's unique character and scenic views are maintained as we grow.

Thank you for considering these requests.

Bora Han
