Hello

It is embarrassing just to build project on one side and not across the entire city, clearly the cheaper side of Sausalito. This is what happens in third world countries, I grew up in the third world.

The other side of Bridgeway has plenty of spaces and lots that aren't occupied, and there are other parks in that case to also touch and affect them and reduce the burden to just one "convenient" side of the city avoiding the majority of the rest of the city.

This needs to be across the entire city not just one side.

I am not voting for this group, party,, you changed my mind.
