Subject: [EXTERNAL] Spencer Fire House

Please attach this email as a comment to the Planning Commission agenda on 2/19/25.

Please be advised that there is a petition circulating to recommission the Spencer Fire House.

Here are the facts:

1. It is imperative that the City of Sausalito be proactive in preventing fires such as those which decimated Los Angeles.
2. Most fires originate in the Headlands
3. The prevailing winds are easterly from the ocean towards Sausalito
4. Sausalito has many "gulches" and "canyons"
5. As witnessed in LA, fires rip through canyons.
6. A fire which originates in the Headlands could destroy our town if not quickly checked
7. Preparation and proximity to equipment is essential to stop fires before they gain

traction: <https://www.firerescue1.com/wildfire-and-wildland-urban-interface/former-chiefs-criticize-lafd-for-not-deploying-fire-engines-ahead-of-pallisades-fire>

Please recommend the removal of the Spencer Fire House from the Housing Element and recommission it as an active facility for the safety of all our residents.

Sincerely,

John and Kate Flavin
