It's absolutely ridiculous to think that they are putting in an apartment complex in MLK Park area. I moved this area years ago because of the green open space park, the dog park area, and the ability of the community to come together for events at the space. To put more people closely together in area that is fire danger to the citizens around it with no easy access is completely ridiculous. All the unused space in the Sausalito area the side of Bridgeway Makes way more sense to people that pay high taxes for the copy of they own and for years. Let's have common sense and not into something because it's easy.

To have low income housing next to the community area and especially a school makes no sense you're asking for problems.
