Housing development plan

I have glanced at housing proposals along Bridgeway, Ebb Tide, Harbor Dr.

I believe high tides, sea level rising, erosion control, need to be looked at more closely before any development is further considered.

Geological report on stability of hillsides, further stress on sewer, water, electric & gas systems on any new development is considered.

Thank you, in advance of meeting, regarding this important matter of more housing units in waterfront & hillside in City of Sausalito.

Very truly yours,

Nancy McDaniel
