Subject: [EXTERNAL] Spencer fire station

I agree we need more housing in all of California and understand the states mandate. However, our old firehouse on Spencer should not be that place. In face, in light of the LA fires, we absolutely should reinstate that building as a firehouse again. With global warming and entire cities being wiped out by rapidly moving fires, we need a fire house at the top of Sausalito. Please consider this as an important issue and think of the safety of all the people living in the hills and all the way down to the ocean. We often have very high winds up at the top that could spread a spark of fire quickly downward.
