Subject: [EXTERNAL] Amended housing element
Date: Friday, February 7, 2025 6:28:12 PM

I object to the Amended Housing Element specifically the inclusion of the Spencer Fire House, City Hall and the Berg Marinship Property in the Sausalito Housing Element.

Payout to City Council members, even as campaign contributions should have no roll in our local politics, even if it is business as usual at higher levels. Apparently, developers now pay their way to have their sites included for development. This is an abomination.

The Spencer firehouse has been repeatedly deemed as an unacceptable site for development. Already many of the residents on the small streets near this site are completely trapped in the case of a natural emergency. Further limiting egress is a disaster waiting to happen.

Why does Sausalito continue to throw away money to consultants especially when the consultants have no concern for the residents best interest?. We do not need to destroy Sausalito with a huge buffer as recommended by the consultants in meeting the states already ridiculous numbers.

I am appalled by the way City Council and city staff are handling the future of Sausalito with apparent zero concern for the Quality of life of those who already call it home and for the beautiful historic nature of our town.

Susan Samols
