

CITY OF SAUSALITO

Gate 5 Area Drainage Management Study

The City of Sausalito is leading the Gate 5 Area Drainage Management Study to address chronic flooding and sea level rise risks in the Marinship/Gate 5 Road corridor. The effort focuses on locations currently affected by storm events, tidal flooding, and aging drainage infrastructure.

We are hosting an open house to get your feedback on how we should address flooding on Gate 5 Road:

Register Today!

Wednesday, April 29th
4:30 to 6pm

Bay Model
2100 Bridgeway,
Sausalito, CA 94965

This short-term design project is evaluating these vulnerabilities and developing targeted strategies to protect infrastructure, reduce flood impacts, and strengthen long-term resilience for residents, businesses, and shoreline resources.

**Participate in the
Online Survey**
